Project
Online Hackathon FE&FS

Real Projects Partner
Kotur Kafe&Film

Student
Adelisa Kolashinac

———

To whom it may concern,

We are pleased to recommend the students of the team that developed the winning technical solution for Kotur Kafe & Film during the Full Stack and Front-end Hackathon. Their work demonstrated a strong blend of technical skill, collaboration, and attention to detail.

The team successfully delivered a complete and functional MVP, fully aligned with the client's expectations. Their approach to planning the database and creating API routes was well thought out and efficiently executed. The admin panel was comprehensive, including all key features for managing data, and the inclusion of usage statistics showed an impressive level of depth and foresight.

They also presented their work clearly and confidently, with an app that had a smooth and responsive feel. The overall user experience was intuitive and visually consistent, reflecting their ability to deliver both front-end polish and back-end structure.

This team stood out for their solid coordination, problem-solving mindset, and ability to work under pressure—qualities that will serve them well in any future project or professional setting.
